

CopraStance®

Premium copra meal

With high levels of energy from oil and fibre, CopraStance® is a 100% natural feed for livestock. It's also high in bypass protein, and has an ideal protein to energy ratio.

Made from the white part of the coconut, which is dried, heated and ground, **CopraStance®** premium copra meal is totally natural and is free from GMOs, chemicals and preservatives.

CopraStance® contains almost no starch, so unlike grain-based feeds, will not cause problems such as acidosis. Instead, the energy in **CopraStance®** comes from its high content of coconut oil, digestible fibre, and gluconeogenic amino acids.

CopraStance® premium copra meal is highly palatable and available as a meal or pellet.

Benefits of CopraStance®

- ▶ Premium-grade copra meal
- ▶ Contains the optimal balance of protein-to-energy for production feeding
- ▶ High levels of bypass protein (70% of CP)
- ▶ Contains almost no starch - so will not cause acidosis
- ▶ Rich in energy from digestible fibre and oil

Nutrient Analysis

Dry Matter	90%
Metabolisable Energy	12.5MJME/kgDM
Digestible Energy	15MJDE/kgDM
Crude Protein	22%
Bypass Protein	70% of CP
Oil	8 - 10%
Max. Crude Fibre	15%
Starch	0.8%
Calcium	0.08%
Phosphorus	0.57%

Feeding CopraStance®

CopraStance® premium copra meal should be introduced gradually into the diet in a over a period of 10-14 days. It must be fed in conjunction with additional roughage such as hay or pasture. As a basic guide for quantities to feed, refer to the 'Feeding Guide' below.

Feeding Guide

Cattle	kg/day
Calves	0.25 - 0.5
